Artist Statement

Throughout my lifetime in the area of art, I have been driven to embrace my unique way of thinking, creating and designing. I enjoy applying my energy in ways that are thought provoking and inspirational.

My artwork integrates the transparency of glass with beautiful splashes of color, and the element of motion. They are one-of-a-kind, unique creations of modern glass art.

My artwork is a result of years of experimentation with different types, shapes and sizes of glass, along with different paints, color combinations and application techniques.

Currently my artwork is on display in galleries and museums across the country, including Rockefeller Center, Tropicana Casino, and Walt Disney World.

Mission Statement

To create contemporary one-of-a-kind glass art works for fine art galleries and individual collectors while maintaining the highest level of integrity and professionalism.
